DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 27-34, 42-49 and 57-64, drawn to preventing hostile use of computer resources by determining if the requested computer resource is on a list of one or more computer resources that are not accessible to unspecified applications, classified in class 726, subclass 26.
 - II. Claims 35-41, 50-56 and 65-71, drawn to preventing hostile use of computer resources by determining if the request for access has exceeded a pre-set threshold identifying a limited number of processes that may be initiated by the application, classified in class 726, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as determining if the request for access has exceeded a pre-set threshold. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2137

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
